

BASE STATION E3

Compact controller

The Pricer Base Station provides the link between the back office system and the transceivers that send and receive information to and from the electronic shelf labels.

Compact and discreet, the Base Station E3 is suitable for small and mid-sized installations.

Benefits

- Compact size
- Easy connectivity with standard Ethernet and USB connections
- Connect up to 3 transceivers, or use multiple units in the same store
- High speed updates for graphic labels

Specifications

Article Number	25048
Size (w x h x d)	124 x 25 x 81 mm (not including rubber feet, metal fasteners or power supply unit)
Weight	320 g
